

POSITION: Postdoctoral Appointee – Computer Science Cybersecurity

JOB ID: 64498

MANAGER: Heidi Ammerlahn

Sandia National Laboratories is the nation's premier science and engineering lab for national security and technology innovation. We are a world-class team of scientists, engineers, technologists, postdocs, and visiting researchers—all focused on cutting-edge technology, ranging from homeland defense, global security, biotechnology, and environmental preservation to energy and combustion research, computer security, and nuclear defense. DEPARTMENT DESCRIPTION

The Informatics and Decision Sciences Department at Sandia National Laboratories in Livermore, California, develops new algorithms, theory, and software in machine learning, matrix and tensor methods, information retrieval, data mining, complex-systems modeling and analysis, and related areas. We deal with large-scale, complex, real-world problems that require innovative but realistic solutions, often using advanced hardware platforms. The work of the department impacts a wide variety of applications in national security, complex-systems engineering, systems studies, and other areas.

JOB DESCRIPTION

Our department has multiple openings in computer science and applied mathematics for postdoctoral researchers. We are especially seeking experts who can apply theoretical computer-science techniques to cybersecurity. Potential areas of research include, but are not limited to, the following: computational game theory, formal verification, digital forensics, anomaly detection, computational logic, complex systems, and network sciences. Our researchers are expected to conduct innovative research, publish and present results in refereed journals and conferences, develop software, and seek out new and interesting problems of national importance. These positions offer an annual salary of \$80,000.

QUALIFICATIONS

These postdoctoral research positions require a strong record of academic performance and a recent advanced degree (PhD or equivalent degree that was conferred within the past five years) in computer science, mathematics, statistics, or a related area. Candidates must be able to work in a collaborative research environment and must provide evidence of relevant research expertise in the form of technical publications, presentations, software, and/or application knowledge. Other required qualifications include software development competence in C++, Java, MATLAB, or a related language; proficiency in solving problems, prioritizing work, and making decisions; and excellent written- and oral-communication skills.

Expertise in one or more of the following areas is desired for these positions: game theory, statistics and inference, computational logic, complexity theory, programming language theory, graph analysis, machine learning, computational combinatorics, data mining, the mathematics of complex systems, information theory, decision theory, data fusion, natural-language processing, and systems modeling. Other desired qualifications include a background in solving practical problems in science and engineering; encounters with real-world data; and proficiency in software engineering, especially an understanding of object-oriented programming techniques and best practices, high-performance computing experience, and/or SQL database knowledge.

ABOUT SANDIA

Located in Livermore, Sandia/California enjoys close proximity to San Francisco, Silicon Valley, several world-class educational institutions, and diverse cultural and year-round recreational opportunities. Sandia provides employees with a comprehensive benefits package that includes medical, dental, vision, and a 401(k) savings plan. Our culture values work-life balance; we offer programs such as flexible work schedules with alternate Fridays off, on-site fitness facilities, three weeks of vacation, and more.

Sandia National Laboratories is an Equal Opportunity Employer M/F/D/V. If this position requires a security clearance granted by the U.S. Department of Energy (DOE), U.S. citizenship and employee eligibility for clearance processing will be required at the time of hire. If you hold dual citizenship and accept a job offer for a position that requires a DOE-granted security clearance, you may be asked by the DOE to renounce your foreign citizenship and retain only your U.S. citizenship.
